

Mac Pro First Generation GPU Replacement

This guide will demonstrate how to properly and safely replace the GPU for a Mac Pro.

Written By: Andrew Kim

INTRODUCTION

Accessing the GPU is easy and requires no tools. Use this guide to add or replace RAM for your Mac Pro.

Step 1 — Case Panel

- Lift the lever to unlock the case.

Step 2

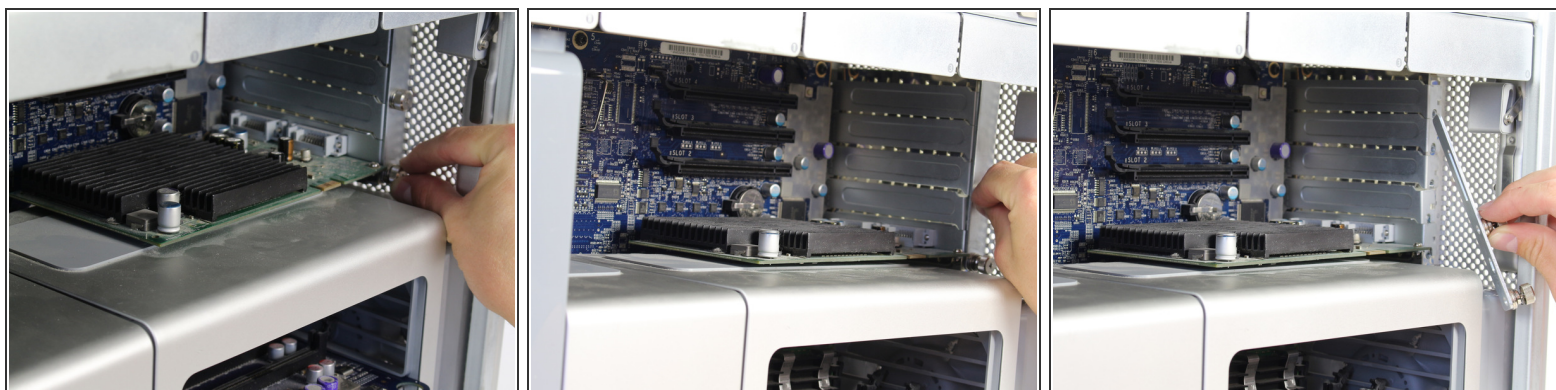

- Remove the side panel of the Mac Pro.
- ⚠ Discharge any static electricity by touching a grounded surface prior to working on any internal components.

Step 3 — GPU (Graphics Card)

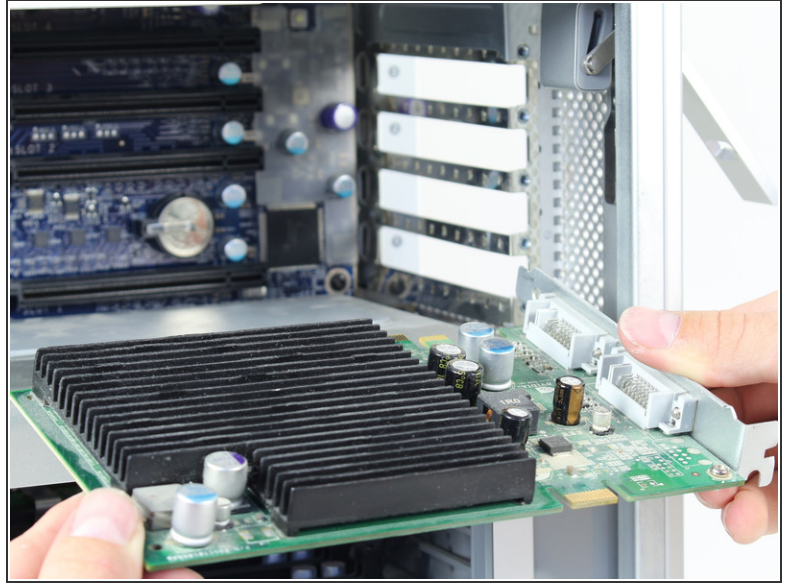

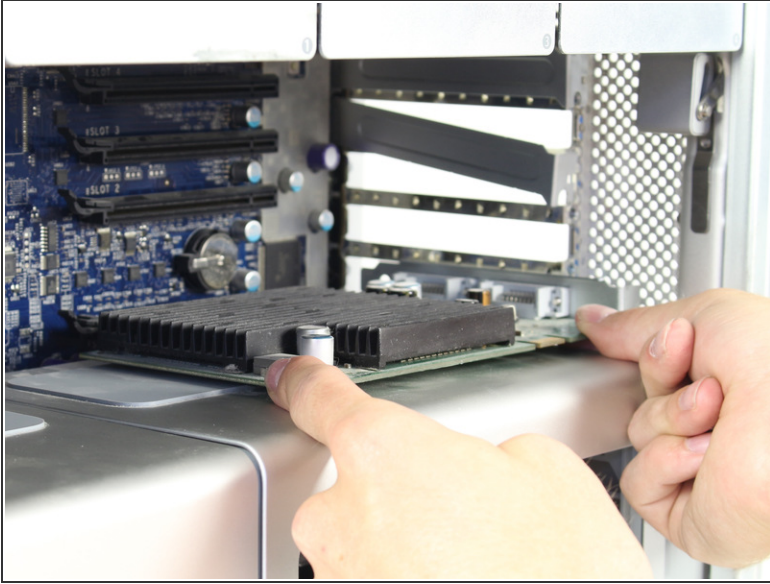

- Locate the graphics card in the open panel side of your Mac Pro.

Step 4

- Unscrew the two thumb screws by twisting counterclockwise using your fingers until the slide lock is released.
- Remove the slide lock.

Step 5

- Slide the graphics card out of the slot using both hands by firmly holding the corners of the top of the card as shown.

To reassemble your device, follow these instructions in reverse order.
